![Bullard logo]

Every call equipped with **Bullard.**

Confidently equip your team with the most effective tools for your department's needs. Decision-making thermal imagers armed with X-Factor Image Enhancement technology and proven durability.

NEW!

QXT™ Pro

- Top performance
- 640 x 480 resolution at 60 Hz
- X-Factor 2.0 Image Enhancement

NEW!

NXT™ Pro

- Top performance
- 640 x 480 resolution at 60 Hz
- X-Factor 2.0 Image Enhancement
- NFPA 1801 Certified

NEW!

DXT™

- Detailed images, balances budget and performance
- 320 x 240 resolution at 60 Hz
- X-Factor 2.0 Image Enhancement

TXS™

- One-button simplicity at an incredible value
- 320 x 240 resolution at 30 Hz
- X-Factor Lite Image Enhancement

Sharper than ever.

Bullard X-Factor Image Enhancement technology sharpens the distinction between objects and backgrounds and optimizes the image for greater clarity. Instantly understand your environment, find your way, and locate victims.

Elements like crisp white edge highlighting and exceptionally vivid images are key components of X-Factor Image Enhancement. This technology helps you recognize objects faster and identify flow patterns to more quickly understand the scene.

X-Factor Image Enhancement: What it means.

Super Red Hot

It's intuitive colorization. Kicking in at 500° F (260° C), this color threshold visually alerts firefighters when temperatures approach a range that may begin to damage personal protective equipment. Consistent and transparent color scheme for quick scene assessment.

Sharpest Details

Highlights essential information. X-Factor 2.0 Image Enhancement features crisp white edge highlighting to make important details easy to identify and understand. Sharpest details available in X-Factor 2.0.

People-Focus

Critical for victim search. The entire image stays bright and detailed, helping reveal people even with high-heat elements elsewhere in the scene. People-focus available in X-Factor 2.0.

Seamless Gain Transition

Seamless operation. No forced shuttering when transitioning between hotter and cooler areas of a scene.

Fluid Viewing Technology

No choppy images. Smooth movement with fluid scenes. Opt for a high refresh rate to gather max info. Identify flow paths and avoid missing key details.

Features that **empower.**

Bullard Thermal Imaging features can help provide critical information, transforming the thermal imager into a versatile tool for many applications and helping speed up specific tasks.
Basic Feature Pack

• Thermal Throttle

• Hot Area Detector

• Cold Area Detector

• Zoom

Advanced Feature Pack

• Thermal Throttle

• Hot Area Detector

• Cold Area Detector

• Zoom

• Image Capture

• Video Recording

• On-Screen Playback

Thermal Throttle

Find hidden heat sources during overhaul. Patented technology empowers users to throttle sensitivity up and down to visually isolate warmer items in any type of scene.

Hot/Cold Area Detector

Save time with instant info. Instantly identify the hottest area of the scene with Hot Area Detector. Use Cold Area Detector to find the coolest spot on-scene**.**

Zoom

Get closer to the scene specifics. Dial in to details even from a distance with the Zoom feature. Helpful when localizing a hot spot or performing outdoor search.

Image Capture

Quickly capture thermal snapshots. Helpful in creating customized training materials.

Video Recording

Record thermal videos. Easily downloadable for use in training sessions.

On-Screen Playback

Facilitate timely training and technical discussions. This feature is training gold. Upon capturing thermal images or video during training, utilize the on-screen playback.

Customized deployment.

Each thermal imager model is optimized to balance essential features and top-quality images with your department's budget.

X-Factor Lite

Delivers exceptional resolution, with low-lag processing and crisp details, including:

• Super Red Hot colorization
• Fluid viewing technology
• Seamless gain transition

X-Factor 2.0

Offers highest performance, includes items from patented X-Factor Lite technology, plus including even more:

• Highest resolutions
• Vivid images with sharpest details
• People-focus
